To the Trade

IN presenting this pamphlet, we wish to call particular attention to the fact that "Laclede-Christy" has been in the clay business for over fifty years, and in that time has established a reputation for turning out the very best clay products of their respective kinds.

Our Vitrified Products, consisting of Double Strength Salt Glazed Sewer and Culvert Pipe, Wall Coping, Chimney Coping and all descriptions of special vitrified clay wares, are unequaled for strength, uniformity and quality.

These products are manufactured from a very fine shale, containing absolutely no lime and very low in other impurities.

We wish especially to call attention to the strength of our sewer pipe, which has again and again proved by practical tests our claim that the "Laclede" Pipe is the strongest made in this country.

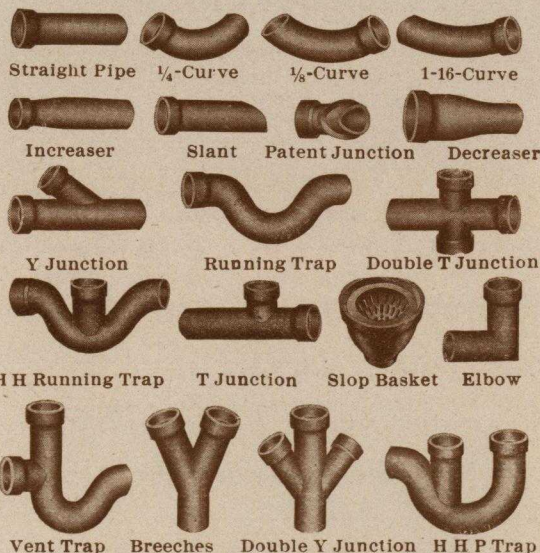

YOUR ATTENTION IS ALSO CALLED TO
OUR HOLLOW FIRE CLAY PRODUCTS

Cuts and designs of the above mentioned articles will be found on the following pages.

If any special shapes, or materials are desired other than those shown in this pamphlet, we will, upon receipt of details covering your requirements, cheerfully furnish designs and estimates covering your particular needs.
